8. Description:	"The Digital Transformation Roadmap of the Government of the Philippines is designed to align with the current administration's strategic direction, particularly its 8-point socioeconomic agenda. This initiative seeks to instill bureaucratic efficiency by leveraging digitalization solutions that enable more efficient, transparent, and effective public service delivery. At the core of this transformation is the role of the Solutions Architect (SA). The SA is tasked with developing and aligning technical designs and blueprints tailored to meet specific business requirements, while ensuring their successful implementation in line with organizational goals. By bridging the gap between business needs and technology capabilities, Solutions Architects provide the technical vision necessary to address complex challenges and deliver sustainable solutions. Engaging a Solutions Architect is therefore a pivotal step in achieving the roadmap's objectives. Their expertise in data architecture is especially critical, as it enables the creation of seamless, data-driven solutions and the optimization of the government's data ecosystem. This ensures that digital initiatives are not only technically sound but also strategically aligned with the overarching mission of modernizing governance and enhancing public service."□□□□□□	
9. Purpose:	The implementation of the digital transformation of the DBM systems and the Integrated Financial Management Information Systems (IFMIS) requires a systematic, qualitative, and executable roadmap for modernization that will enable the Department to achieve several key objectives. These include the quantification of service value chains and service artifacts to establish a foundation for transforming the DBM from traditional bureaucratic conventions into a service-driven and service-oriented organization; the harmonization of the policy environment by identifying and addressing policy artifacts that	

9. Purpose:	repealed, or retired to remove barriers to transformation; the harmonization of systems and solutions, including solutions architectural practices, business intelligence, and data science foundations; and the definition of an executable implementation plan with detailed technical specifications to pilot Public Financial Management (PFM) projects within the targeted period. To realize these objectives, the engagement of a Solutions Architect is essential, as their expertise ensures that the roadmap is strategically aligned, technically sound, and capable of driving the Department's digital transformation agenda forward.□□□□□□

8. Description:	The role of a Data Architect Consultant (DAC) is a practitioner of data architecture, and data management discipline concerned with designing, creating, deploying and managing an organization's data architecture. The DAC develops the architectural design and strategy on how the data will be stored, consumed, integrated and managed by different data entities and IT systems, as well as any applications using or processing that data in some way. Thus, the engagement of a DAC is an essential resource to enable the foregoing objectives.□□□□□□	
9. Purpose:	"The implementation of the digital transformation of the DBM systems and the integrated financial management information (IFMIS) requires a systematic, qualitative,a dn executable roadmap for digital transformation and technology modernization to achieve the following objectives: Rationalize policies that hinder reform, strengthen and harmonize the Deparment's data and analytics environment Measure and map the Department's service processes and outputs to support DBM's transition from a bureaucratic structure to a service-driven and service-oriented organization. Develop a clear and executable implementation plan with tehcnical specifications to pilot PFM projects within the target period."□□□□□□

8. Description:	The Business Analyst will be responsible for ensuring that business processes, strategies and solutions align with the organization's goals of IFMIS. Key responsibilities of a business analyst are to bridge the gap between business and technical stakeholders from planning, analysis and designing a solution to implementation.	
9. Purpose:	The role of a Business Analyst is critical in helping organizations align their business and technology strategies, ensuring that their IT systems and processes support their overall objectives and long-term goals. To successfully support the implementation of the IFMIS, the DBM requires the expertise of a highly technical Consultant. This expert should possess specialized knowledge in digital solutions, regulatory processes, and problem-solving capabilities. Their role will be to help design and implement innovative solutions that enhance public trust, transparency, and operational efficiency. The Consultant will play a crucial role in supporting the project team, ensuring the successful execution of the transformation, and enabling the DBM to achieve its digitalization goals for the vehicle insurance sector. The Business Analyst will be responsible for ensuring that business processes, strategies and solutions align with the organization's goals of IFMIS.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Managed Services for the Third-Party Audit & Certification (TPAC) for Budget and Treasury Management System (BTMS)	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	11	
4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	51,500	
Revised	0	
7. Total Proposal Cost:	51,500	
8. Description:	The Managed Services for the Third Party Audit and Certification (TPAC) for the Budget and Treasury Management System (BTMS) will provide independent validation of the system's security, controls, and compliance as BTMS is implemented across government agencies. The engagement will support regular assessment and certification of system safeguards to ensure that BTMS operates in accordance with required standards and governance requirements. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening oversight, accountability, and risk management for the implementation of core digital PFM systems. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the importance of strong governance, security assurance, and independent validation mechanisms for large scale government digital platforms. The initiative has been identified by the PFM Committee as a non negotiable and highly prioritized requirement that must be sustained through 2028 as part of the BTMS rollout. Independent audit and certification are essential to ensure system integrity, compliance, and risk mitigation throughout implementation.	
9. Purpose:	The purpose of the Managed Services for the Third-Party Audit & Certification (TPAC) for Budget and Treasury Management System (BTMS) is to obtain independent assurance that BTMS complies with approved functional, technical, security, and operational requirements prior to and during system deployment and operations. The initiative seeks to identify and address gaps related to system functionality, scalability, cybersecurity controls, documentation, and data migration to ensure reliable financial transaction processing, safeguard the integrity of government financial information, support pilot and production readiness, and sustain continuous certification through recurring audits to strengthen transparency, accountability, and risk management in public financial management operations.

7. Total Proposal Cost:	271,006	
8. Description:	The subscription to additional licenses for the Budget and Treasury Management System (BTMS) is required to support the continued nationwide rollout of BTMS across government agencies. The additional licenses will ensure that participating agencies have the necessary system access to support operational use of the platform as implementation expands. Under Intervention 1 of the Digital PFM Reform Action Plan, the rollout requires an estimated 9,707 additional user licenses at a unit cost of php 27,105.46 per license. These licenses will cover user accounts for agencies included in Batch 2 and Batch 3 of the BTMS rollout, ensuring operational readiness and uninterrupted access to the system. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by enabling the continued expansion and adoption of BTMS as a core digital platform for government financial management. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the nationwide implementation of integrated digital financial management systems. The activity has been identified by the PFM Committee as a non-negotiable and highly prioritized requirement that must be implemented through 2028 as part of the BTMS reform program. The additional licenses are essential to sustain agency onboarding, prevent access constraints, and support uninterrupted system operations as BTMS adoption expands.	

9. Purpose:	The additional licenses will support the expansion of system users, increased transaction volumes, and evolving functional and regulatory requirements of government financial management operations.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Subscription to Budget and Treasury Management System (BTMS) for Treasury Management (TM) and Budget Management (BM)	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	13	
4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	103,000	
Revised	0	
7. Total Proposal Cost:	103,000	
8. Description:	The Subscription for the Budget and Treasury Management System (BTMS) for Treasury Management and Budget Management Modules is required to activate and enhance core BTMS functionalities across implementing agencies. The subscription will support the full operationalization of the Budget Management (BM) and Treasury Management (TM) modules as part of the ongoing nationwide rollout of BTMS. The activation of the BM and TM modules will enable end to end budget execution, cash management, disbursement processing, and real time financial reporting within a unified digital platform. This will strengthen the integration of budget and treasury processes, reduce manual interventions, and improve transparency, control, and efficiency in public fund management. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the implementation of BTMS as the core digital platform for government financial management. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the nationwide adoption of integrated digital financial management systems. The activity has been identified by the PFM Committee as a non negotiable and highly prioritized requirement that must be implemented through 2028 as part of the BTMS reform program. The subscription is therefore proposed for Tier 2 funding to support the continued expansion and operationalization of BTMS across government agencies.	
9. Purpose:	The additional licenses will support the expansion of system users, increased transaction volumes, and evolving functional and regulatory requirements of government financial management operations.

7. Total Proposal Cost:	0	
8. Description:	The Managed Services for the Development of the LGU Portal of the Department of Budget and Management (DBM) is a priority digital initiative scheduled for implementation starting in 2026. The project will establish a centralized digital platform to support the online delivery of services and applications of the Local Government and Regional Coordination Bureau (LGRCB), thereby improving the efficiency, transparency, and accessibility of DBM services to Local Government Units (LGUs). The project contributes to the implementation of the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, which promotes the modernization and interoperability of PFM systems to enhance efficiency, transparency, and timeliness of financial management processes. It also supports Strategic Focus Area 10: PFM for Local Government Units, which aims to strengthen fiscal coordination and institutional arrangements for improved public financial management at the local level. The project further aligns with the PFM Digital Transformation Roadmap 2024–2028, which advances the development of integrated digital platforms and interoperable systems to modernize the PFM ecosystem and enhance government service delivery. Through the LGU Portal, DBM will strengthen digital engagement with LGUs, streamline coordination and reporting processes, and improve access to fiscal information and services. As a new digital platform that expands DBM's digital service delivery and supports the implementation of priority PFM reform initiatives, the project requires additional resources beyond existing programs.	

9. Purpose:	The LGU Portal project aims to achieve the following objectives: 1. To design and develop a secure, centralized, and web-based portal that serves as the single access point for all LGRCB applications. 2. To continue to implement standardized authentication, authorization, and role-based access control aligned with DBM Identity and Access Management policies. 3. To continue to support end-to-end digital workflows for LGU public financial management assessment, reporting, review, and monitoring. 4. To continue to enable centralized oversight and performance monitoring at the LGU, regional, and national levels. 5. To continue to provide a scalable and extensible platform capable of onboarding additional LGRCB applications in the future.

8. Description:	"The Managed Services for the Development of the Convergent GovHub for the Department of Budget and Management (DBM) is a strategic digital initiative that will establish a unified platform to integrate key DBM systems and improve interoperability across core Public Financial Management applications. The platform will help reduce system fragmentation, enable more consistent data exchange, and support more efficient coordination across DBM digital services. The project contributes to the implementation of the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening systems integration and supporting more efficient and reliable digital financial management processes. The initiative also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the development of interoperable platforms and integrated digital infrastructure to	
9. Purpose:	"Convergent Gov Hub. Aims to enable the (a) integration of various DBM stand-alone systems (such as Online Submission of Budget Proposal (OSBP), Enhanced Budget Preparation Management System (eBPMS), Action Document Releasing System (ADRS), Unified Reporting System (URS) and Unified Accounts Code Structure (UACS) Repository) and data sources into a single central core; (b) allow multiple functions to work in a single device or platform; and (c) simplify the consolidation of fiscal information for the oversight and implementing agencies.□□□□□□"□□□□□□□□

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Manage Services for the Revision of the Unified Account Code Structure (UACS) under the Digital Public Financial Management (PFM) Initiative	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	18	
4. Categorization	[X] New [ ] For issuance of [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	36,050	
Revised	0	
7. Total Proposal Cost:	36,050	
8. Description:	The Managed Services for the Revision of the Unified Accounts Code Structure (UACS) will update and strengthen the national coding framework used for budgeting, accounting, and financial reporting across government agencies. The project will support the review and revision of the current UACS to ensure that it remains aligned with evolving public financial management requirements and digital systems. The engagement will reconstitute the UACS Technical Working Group, assess existing issues and gaps in the current coding structure, and evaluate the impact of proposed revisions on IT systems and related policies. It will also support the preparation of updated manuals, guidelines, and system configurations to ensure alignment with the Budget and Treasury Management System (BTMS), Integrated Financial Management Information System (IFMIS), and other digital PFM platforms. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the underlying data structures that enable consistent financial reporting and integration across digital systems. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes standardized data structures and interoperable systems to improve reporting accuracy and financial transparency. The initiative is assessed as medium priority under the Reform Plan, as it represents a foundational but sequenced reform activity that will enhance reporting accuracy, data consistency, and interoperability across government systems.	
9. Purpose:	The primary objective of the Data Warehouse Infrastructure Project and the Managed Services Project on Data Warehouse Infrastructure is to provide enterprises with a complete end-to-end solution for their data management needs. The main goal of the project is to	

9. Purpose:	plan, build, and put into place a dependable data warehouse infrastructure that meets the needs and goals of the company. By ensuring continuous infrastructure optimization, monitoring, and maintenance, the integration of managed services later on enhances the infrastructure's long-term performance and reliability. By incorporating continuous support into the project framework, this integrated approach addresses the pressing need for technology and creates a model that is reasonably priced. In addition to supporting strategic decision support, the combined efforts help to educate decision-makers by maintaining data consistency and accessibility. This concerted effort is the main goal of the Data Warehouse.

5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	37,038	
Revised	0	
7. Total Proposal Cost:	37,038	
8. Description:	The Managed Services for the General Appropriations Bill Authorization and Innovation (GABAI) Platform for the Department of Budget and Management (DBM) aims to automate and enhance the processing, tracking, and analysis of the General Appropriations Bill within DBM. The platform will strengthen workflow management, improve document traceability, and support more efficient coordination during the budget authorization process. The project contributes to the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by supporting the digitalization and modernization of core budget preparation and authorization processes. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes integrated digital platforms that improve efficiency, transparency, and coordination across government financial management systems. The initiative is assessed as high priority as it is closely linked with the Budget and Management System (BMS) and the Technical Innovation for the National Expenditure Program (TINA) application. Integration with these systems will help ensure data consistency, reduce manual processing, and strengthen end-to-end budget preparation and authorization workflows.	
9. Purpose:	The project aims to provide managed services for the development and sustained operation of a centralized platform that supports the House of Representatives in the review, amendment, and authorization of the General Appropriations Bill by streamlining workflows, automating legislative budget reports, ensuring accurate version and change tracking, and enhancing the efficiency, transparency, and reliability of the budget authorization process.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Subscription to Cloud-based Anti-Virus Scanning Tool for APIs (CAVST) for the Department of Budget and Management (DBM)	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	20	
4. Categorization	[X] New [ ] For issuance of [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	2,781	
Revised	0	
7. Total Proposal Cost:	2,781	
8. Description:	The subscription to the cloud-based Anti-Virus Scanning Tool for APIs (CAVST) for the Department of Budget and Management (DBM) is a critical cybersecurity measure designed to protect DBM digital platforms from malicious files and payload-based threats. The solution enables automated scanning of files and attachments before they are uploaded or transmitted through application programming interfaces, ensuring that only verified and secure files are processed within DBM systems. The project supports the implementation of the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the cybersecurity controls that safeguard digital PFM platforms and ensure the secure processing and exchange of financial and administrative data across systems. By implementing automated file-level protection, the solution helps protect critical systems from malware, ransomware, and other cyber threats that could disrupt financial management operations. The initiative also aligns with the PFM Digital Transformation Roadmap 2024–2028, which highlights the importance of secure and resilient digital infrastructure in enabling interoperable and integrated government systems. Through the implementation of CAVST, DBM enhances the protection of data exchanges across its digital platforms and supports the secure operation of APIs and system integrations within the PFM ecosystem. Given the increasing volume of online submissions, document uploads, and system integrations across DBM platforms, sustained file-level protection is necessary to prevent malware injection, ransomware risks, and data compromise. The continued subscription to the solution ensures uninterrupted protection and access to updated threat intelligence.	

9. Purpose:	A cybersecurity precaution intended to shield DBM digital platforms from harmful files and payload-based threats is the Department of Budget and Management's (DBM) subscription to the cloud-based Anti-Virus Scanning Tool for APIs (CAVST). The solution makes it possible for files and attachments to be automatically scanned before being uploaded or sent via application programming interfaces, guaranteeing that only secure and validated data are handled by DBM systems.
10. Beneficiaries:	A cybersecurity precaution intended to shield DBM digital platforms from harmful files and payload-based threats is the Department of Budget and Management's (DBM) subscription to the cloud-based Anti-Virus Scanning Tool for APIs (CAVST). The solution makes it possible for files and attachments to be automatically scanned before being uploaded or sent via application programming interfaces, guaranteeing that only secure and validated data are handled by DBM systems.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Cybersecurity Rapid Remediation Services for the Department of Budget and Management	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	21	
4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	9,270	
Revised	0	
7. Total Proposal Cost:	9,270	
8. Description:	"The Cybersecurity Rapid Remediation Services for the Department of Budget and Management (DBM) is a critical initiative aimed at addressing identified security vulnerabilities across DBM's digital systems and infrastructure. The project will implement rapid remediation measures to mitigate risks identified through Vulnerability Assessment and Penetration Testing (VAPT) and continuous monitoring conducted under the Cyber Security Operations Center (CSOC) Project, thereby strengthening the security posture of DBM's digital platforms. The project supports the implementation of the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening cybersecurity controls that protect the integrity, availability, and confidentiality of digital PFM systems. By addressing security vulnerabilities and implementing corrective measures, the project ensures the reliability and resilience of critical financial management platforms supporting DBM operations. The initiative also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the importance of secure and resilient digital infrastructure in the modernization of government financial management systems. Through the implementation of rapid remediation services, DBM will strengthen its capacity to safeguard mission critical digital platforms and ensure the continued delivery of secure and reliable digital services. Given the increasing cybersecurity risks facing government information systems and the need to protect critical PFM platforms and infrastructure, the project requires dedicated resources to implement timely remediation and maintain system security.	
9. Purpose:	The purpose of the project is to strengthen the Department of Budget and Management's overall cybersecurity posture by addressing identified security gaps, optimizing the use of existing technological solutions, and supporting informed decision-making through accurate reporting. Through rapid remediation and effective prioritization of cybersecurity initiatives, the project aims to reduce the risk of exploitation, protect critical information assets, and ensure alignment with the DBM's mandate, mission, and vision.

7. Total Proposal Cost:	56,650	
8. Description:	The subscription to the Managed Integrated Operations Center (IOC) is a strategic initiative to strengthen centralized IT operations and support services for DBM's mission-critical Public Financial Management systems. The IOC will provide structured Level 1 and Level 2 technical support, systems and database administration, performance monitoring, and coordinated incident response to help maintain system stability and improve service delivery. The initiative supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening operational support for digital PFM systems and ensuring the reliability and availability of core financial management platforms. The project also aligns with the PFM Digital Transformation Roadmap 2024–2028, which highlights the need for stronger operational governance, system monitoring, and technical support mechanisms to sustain expanding digital platforms across government. Given the increasing number and complexity of DBM digital systems, a centralized operations center is necessary to reduce downtime, improve service levels, and strengthen oversight of system performance and security.	
9. Purpose:	The Integrated Operations Center will enhance the existing IT support framework by integrating professional managed services. This integration will help address the growing demand for rapid, efficient, and effective IT problem resolution and ensure operational continuity across all departments and agencies.	
10. Beneficiaries:	Department of Budget and Management

8. Description:	The Managed Services for the Development of the Authority to Purchase Motor Vehicle (APMV) System for the Department of Budget and Management (DBM) aims to automate and streamline the processing, evaluation, and approval of motor vehicle purchase requests. The system will standardize workflows, improve transparency, strengthen monitoring, and reduce manual processing across concerned DBM units.	
9. Purpose:	The objective of this project is to enhance and provide continued support for the Authority to Purchase Motor Vehicles (APMVs) application system developed using the existing BPM/RPA and Front-End Low-code Platforms of DBM. This is part of the continuing efforts of the government to improve bureaucratic efficiency through digital transformation.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Supply, Delivery, Installation, and Configuration of Server Infrastructure for the DBM Private Artificial Intelligence Platform	
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary	
3. Priority Ranking No.	24	
4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[X] Infrastructure [ ] ICT [ ] Non-ICT [ ] Non-Infrastructure [ ] ICT [ ] Non-ICT
5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	154,500	
Revised	0	
7. Total Proposal Cost:	154,500	
8. Description:	The Supply, Delivery, Installation, and Configuration of Server Infrastructure for the DBM Private Artificial Intelligence Platform will establish a secure computing environment to support AI model training, analytics, and data processing within the Department of Budget and Management. The infrastructure will enable DBM to manage sensitive data within a controlled environment while supporting the development and deployment of artificial intelligence capabilities for internal operations and decision support. The project contributes to the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the digital infrastructure needed to support advanced analytics, data-driven insights, and improved financial management processes. The initiative also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the development of modern digital infrastructure and data platforms to enhance the efficiency and integration of government financial management systems. The proposed infrastructure will strengthen DBM's capability to support AI-driven analytics and digital innovation.	
9. Purpose:	The primary purpose of the DBM AI Infrastructure Platform project is to establish a secure, on-premises foundational layer for all Department of Budget and Management (DBM) Artificial Intelligence initiatives. By hosting the infrastructure at the Secondary Data Center (SDC), the DBM aims to ensure full compliance with Philippine data sovereignty, privacy, and security laws while maintaining a restricted environment that does not rely on public internet connectivity. Furthermore, this initiative is designed to allow the DBM to independently deploy and scale AI workloads—such as Large Language Models (LLMs) and vector databases—thereby avoiding vendor lock-in and ensuring the long-term sustainability of AI investments. Ultimately, the project aligns the Department's AI capabilities with broader digital transformation efforts, including the Integrated Financial Management Information System (IFMIS) and future GovTech programs.

7. Total Proposal Cost:	6,180	
8. Description:	The Supply and Delivery of Server Racks for MINAI and Other Public Financial Management (PFM) Projects in the Secondary Data Center (SDC) will support the proper installation, organization, and protection of server equipment used by DBM digital platforms. The provision of standard data center racks will improve infrastructure stability, enable efficient equipment management, and ensure compliance with data center operational standards. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the infrastructure required to sustain digital PFM systems and related platforms. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the need for reliable and scalable digital infrastructure to support expanding government systems and data platforms.	
9. Purpose:	The primary objective of this project is to implement a scalable, secure, and high-performance storage infrastructure that ensures the availability and integrity of MINAI and critical Public Financial Management (PFM) workloads. This initiative will modernize data management by supporting robust disaster recovery and replication protocols, ensuring strict regulatory compliance with PFM laws and auditing standards, and mitigating operational risks associated with manual data handling and capacity limitations.

7. Total Proposal Cost:	2,618	
8. Description:	The Supply and Delivery of Marketing Collaterals for the Integrated Financial Management Information System (IFMIS) will support stakeholder engagement, awareness, and change management activities for major Public Financial Management (PFM) digital initiatives. These materials will be used during the rollout of key systems such as the Budget and Treasury Management System (BTMS), Integrated Human Resource Information System (IHRIS), blockchain initiatives, and other related PFM projects to clearly communicate objectives, benefits, and implementation timelines. The initiative supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening stakeholder engagement and promoting the adoption of digital PFM systems across government. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the importance of effective communication and change management in the successful implementation of large-scale digital platforms. Effective communication and stakeholder engagement are essential to ensure user adoption, manage transition risks, and support the nationwide rollout of core IFMIS components.	
9. Purpose:	This document provides an overview of the project for the supply and delivery of marketing collaterals for the Integrated Financial Management Information System (IFMIS). The objective of this project is to develop and distribute a comprehensive set of marketing materials to promote and create awareness about the IFMIS among target audiences, including government agencies, financial institutions, and potential users.

5. DEPDev PIP Code:		
6. Total Project Cost:		
Original	1,030	
Revised	0	
7. Total Proposal Cost:	1,030	
8. Description:	"The Subscription to a Project Collaboration Software for the Department of Budget and Management (DBM) is a key digital enabler that will support the coordinated implementation and governance of multiple Digital Public Financial Management initiatives of the Department. The platform will provide a centralized environment for tracking project milestones, deliverables, risks, issues, and dependencies, thereby strengthening oversight and coordination across DBM's digital reform initiatives. The project contributes to the implementation of the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by supporting the effective management and monitoring of digital PFM systems and initiatives. By providing structured project monitoring and collaboration capabilities, the platform will enhance the ability of DBM to manage complex digital programs and ensure timely delivery of reform initiatives. The initiative also supports the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the need for strengthened governance, coordination, and monitoring mechanisms to effectively implement large scale digital transformation programs. Through the adoption of a project collaboration platform, DBM will improve coordination among project teams, enhance transparency in project execution, and support more effective reporting and decision making across digital PFM initiatives. The subscription is planned for procurement in 2026 and will be maintained to ensure continuous monitoring, reporting, and governance of ongoing digital transformation programs. "□□□□□□□□	
9. Purpose:	To achieve a modern and efficient financial ecosystem, the project aims to design, develop, and implement a unified PFM systems integration framework and data architecture that establishes standardized data exchange protocols and generates real-time financial insights for stakeholders within a twelve (12) month	

9. Purpose:	period. This initiative begins by harmonizing data standards and business processes across existing PFM systems, including IFMIS, BTMS, and Treasury systems, to ensure a cohesive foundation. Building upon this, the project will develop a scalable integration layer and data orchestration platform to enable seamless interoperability across the various modules. To protect the integrity of the information, the framework will establish robust data governance, access control mechanisms, and security standards in line with national requirements. Finally, the project will validate the architecture through pilot integrations and the generation of consolidated financial reports and analytics to ensure the system meets its functional and strategic goals.□□□□□□□□

8. Description:	The subscription to an IT Governance Platform for the Department of Budget and Management (DBM) will strengthen the Department's digital governance, enterprise architecture planning, cybersecurity strategy, and oversight of IT investments. The platform will provide access to research, advisory insights, benchmarking tools, and best practice frameworks to support informed decision-making for DBM's digital initiatives. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening governance mechanisms that guide the planning, development, and management of digital PFM systems. The initiative also aligns with the PFM Digital Transformation Roadmap 2024–2028, which highlights the importance of strong digital governance and enterprise architecture practices to support the modernization and integration of government financial management systems. By providing access to global best practices and strategic advisory resources, the platform will help DBM improve digital strategy, strengthen cybersecurity planning, and ensure more effective governance of its digital transformation initiatives.
9. Purpose:	A subscription to an IT Governance Platform serves as a strategic investment for organizations aiming to enhance their competitive edge and drive sustainable growth in today's dynamic business environment. This comprehensive resource equips decision-makers with the knowledge and foresight needed to navigate complex challenges, anticipate market trends, evaluate emerging technologies, and mitigate risks effectively. Whether it is shaping strategic initiatives, optimizing IT investments, or staying ahead of disruptive forces, a Gartner subscription empowers enterprises to

	make informed decisions, innovate with confidence, and achieve their desired outcomes in an ever-evolving landscape.

7. Total Proposal Cost:	0

8. Description:	"The Construction and Establishment of the DBM Budget and Treasury Management System (BTMS) Command Center will provide a centralized facility for monitoring, coordination, and oversight of BTMS operations and implementation activities. The Command Center will enable real time monitoring of system performance, rollout progress, incident management, and coordination among implementing agencies. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening operational oversight and monitoring mechanisms for the implementation of digital PFM systems. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the need for stronger operational governance and monitoring capabilities to support large scale digital platforms such as BTMS. The Command Center will enhance monitoring capability and institutional oversight of BTMS operations once resources become available. "□□□□□□□□
9. Purpose:	To renovate and modernize the DBM BTMS Command Center at the Arcache Building by upgrading its physical facilities, IT infrastructure, and environmental systems. This project aims to establish a high-readiness hub for centralized monitoring, governance, and training, ensuring the operational capacity necessary to drive the nationwide BTMS rollout and provide seamless post-production support.□□□□□□□□

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Managed Services for the Design and Development of National Government Human Resource Management System (NGHRMS)
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary

3. Priority Ranking No.	32

4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT

5. DEPDev PIP Code:	

6. Total Project Cost:	
Original	0
Revised	581,950
7. Total Proposal Cost:	0

8. Description:	The Managed Services for the Design and Development of the National Government Human Resource Management System (NGHRMS) will support the development of a unified digital platform for managing human resource processes across national government agencies. The system will streamline HR operations, standardize personnel records, and improve the efficiency of workforce management within government. The initiative will complement the Civil Service Commission (CSC) Modernization Program through the development and integration of a National Payroll System, enabling more efficient processing of compensation, benefits, and personnel related transactions. The system will support improved coordination among government agencies and strengthen the integration of HR and payroll processes within the broader digital government ecosystem. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening digital systems that support personnel expenditure management and financial reporting across government. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the development of integrated digital platforms to modernize government operations and improve data sharing across systems. The initiative is identified as a high priority under the Digital PFM Reform Action Plan, as it supports the modernization of HR and payroll management and strengthens integration with core financial management systems.
9. Purpose:	The Government of the Philippines aims to modernize and harmonize human resource management processes across national government agencies through the establishment of a unified and integrated National Government Human Resource Management System (NG-HRMS). Currently, HR functions such as recruitment, personnel administration, plantilla management, performance management, learning and development, and workforce analytics are implemented through fragmented systems and manual

	processes. This results in inconsistent HR data, operational inefficiencies, compliance challenges, and limited analytics capabilities for national-level workforce planning. To address these gaps and support digital transformation initiatives, the Department of Budget and Management (DBM) shall serve as the Lead Executing Agency for the NG-HRMS Project, in coordination with the Civil Service Commission (CSC) and the Department of Information and Communications Technology (DICT). DBM intends to engage a Managed Service Provider (MSP) for the design, development, implementation, and ongoing managed services of the NG-HRMS under a long-term managed services model to ensure sustainability, interoperability, and continuous system enhancement.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Managed Services for the Assessment of e-GovPay Platform for Government Payments and Collections
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary

3. Priority Ranking No.	33

4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT

5. DEPDev PIP Code:	

6. Total Project Cost:	
Original	12,360
Revised	0
7. Total Proposal Cost:	0

8. Description:	The Managed Services for the Assessment of the e-GovPay Platform for Government Payments and Collections will evaluate the implementation and adoption of the platform across government agencies. The engagement will review current rollout progress, assess system functionalities and integrations, identify operational constraints, and recommend enhancements to improve system performance and accelerate adoption. The assessment will also develop a detailed rollout strategy, including the policy, institutional, and resource requirements needed to support broader use of the platform by agencies, citizens, and businesses. The recommendations will guide improvements in system integration, operational processes, and governance arrangements for digital payments. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening digital platforms that support efficient and transparent government financial transactions. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the adoption of interoperable digital platforms for government financial services, including digital payments and collections. The initiative is assessed as medium priority under the Reform Action Plan, as it is a diagnostic and enabling activity that will inform future improvements and wider implementation of the platform.
9. Purpose:	To establish the eGovPay Platform as the single, mandated payment channel for all government receipts, this project aims to assess the current system's implementation gaps and execute a comprehensive national rollout within a three-year period. The initiative begins with a detailed current-state assessment to identify technical limitations and adoption barriers, engaging stakeholders to define necessary system enhancements. Building on this

	assessment, the project will develop and implement a binding policy framework to mandate platform usage across all government agencies. To drive adoption, the project will design and execute targeted awareness campaigns for citizens and businesses, while simultaneously rolling out system enhancements and conducting capability-building programs for agency personnel. The initiative will culminate in the phased onboarding of all identified government agencies and services, with success measured against defined targets for agency participation and transaction volumes processed through the platform.

7. Total Proposal Cost:	0

8. Description:	The Managed Services for the Feasibility Assessment of the Public Financial Management (PFM) Core System for Off Budget will evaluate the integration of off budget accounts into core PFM IT systems, particularly the Budget and Treasury Management System (BTMS). The engagement will assess the feasibility of covering off budget execution and related payments through BTMS while ensuring compliance with applicable legal and regulatory frameworks governing these accounts. The assessment will review existing processes, design the necessary business procedures and guidelines for integration, and identify system enhancements required to support off budget execution and reporting through BTMS. It will also develop a phased implementation approach, including pilot inclusion and a broader rollout strategy. The project supports the Public Financial Management Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by supporting the long term objective of integrating financial management processes within a unified digital platform. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which promotes the integration and interoperability of government financial management systems to improve transparency, reporting, and oversight. The initiative is assessed as medium priority, consistent with the Digital PFM Reform Action Plan, as it is a preparatory activity that supports the long term integration of off budget accounts into the core PFM systems.
9. Purpose:	The overall objective of this engagement is to conduct a feasibility assessment for the inclusion of off budget execution and related payments in the Core PFM Systems, particularly BTMS.

8. Description:	The Managed Services for the Drafting and Adoption of IT Governance and Cybersecurity Policies for Public Financial Management (PFM) Systems will support the development of policy frameworks to guide the secure and effective use of digital technologies in government financial management systems. The engagement will review existing policies, benchmark international best practices, and identify priority policy areas to strengthen governance, cybersecurity, and technology management across PFM platforms. The project will support the drafting of key policy instruments, including an AI roadmap for PFM systems, a national cybersecurity policy, and a framework for source code ownership and management. It will also facilitate consultations and workshops with government agencies, LGUs, and technical experts to gather feedback and refine the proposed policies. The initiative will further support legal vetting, government approval processes, and the dissemination of approved policies to relevant stakeholders. Compliance monitoring and policy implementation reviews will also be conducted to ensure effective adoption across agencies. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening governance, security, and policy frameworks for digital PFM systems. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the importance of clear governance structures, cybersecurity standards, and responsible technology management in sustaining modern digital platforms.
9. Purpose:	The purpose of this project is to establish clear, coherent, and actionable frameworks that will guide the secure modernization and responsible digital innovation of PFM systems. It aims to ensure that AI integration, cybersecurity governance, and source code management are aligned with existing laws, standards, and national

	digital government priorities, while strengthening transparency, efficiency, accountability, and the protection of personal government financial data and infrastructure.

Revised BP Form 202 (2027 Budget Tier 2)

PROFILE FOR TIER 2 BUDGET PROPOSALS

1. Proposal/Project Name	Managed Services for the Comprehensive Assessment, Rationalization, and Optimization of IT Infrastructure for Hosting Public Financial Management (PFM) Systems
2. Implementing Department / Agency	Department of Budget and Management (DBM) / Office of the Secretary

3. Priority Ranking No.	36

4. Categorization	[X] New [ ] For issuance of MYCA: [ ] Expanded/Revised	[ ] Infrastructure [ ] ICT [ ] Non-ICT [X] Non-Infrastructure [ ] ICT [ ] Non-ICT

5. DEPDev PIP Code:	

6. Total Project Cost:	
Original	15,450
Revised	0
7. Total Proposal Cost:	0

8. Description:	The Managed Services for the Comprehensive Assessment, Rationalization, and Optimization of IT Infrastructure for Hosting Public Financial Management (PFM) Systems will evaluate the current hosting environment supporting PFM platforms and identify opportunities to improve efficiency, cost effectiveness, and system performance. The engagement will establish a comprehensive inventory of existing hosting locations and conduct a cost analysis of current infrastructure arrangements. The project will assess inefficiencies in the current hosting model, identify duplications and redundancies, and undertake technical feasibility and cost benefit analyses to determine optimal infrastructure configurations. Based on the findings, a consolidation and optimization roadmap will be developed to guide the rationalization of hosting environments across PFM systems. The initiative will also support pilot implementation of the recommended consolidation approach for selected systems, followed by a phased rollout to optimize infrastructure hosting across the broader PFM ecosystem. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management, by strengthening the infrastructure foundation required to support integrated digital PFM platforms. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes efficient, scalable, and secure infrastructure to support the growing number of government digital systems.
9. Purpose:	To assess, rationalize, and optimize the IT infrastructure hosting the Government's PFM systems, including BTMS, ensuring security, scalability, cost-efficiency, resilience, and compliance with DICT standards, while providing a strategic roadmap for consolidation and future modernization initiatives.

7. Total Proposal Cost:	0

8. Description:	The Managed Services for Comprehensive IT Infrastructure Gap Analysis and Validation to Support Infrastructure Strengthening at Regional and LGU Levels will assess the current IT infrastructure of selected regions and Local Government Units (LGUs) to identify gaps and determine the requirements needed to support digital government and PFM systems. The engagement will establish a standardized assessment methodology, conduct infrastructure assessments across targeted regions and LGUs, and validate the findings. It will define the required infrastructure specifications, estimate procurement and implementation costs, and prepare a prioritized rollout plan for infrastructure strengthening. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 6: Digital Public Financial Management and Strategic Focus Area 10: PFM for Local Government Units, by strengthening the infrastructure needed to support digital PFM systems at the regional and local levels. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which highlights the importance of reliable and scalable digital infrastructure to support integrated government systems.
9. Purpose:	The objectives of this engagement are to: Conduct a standardized and comprehensive assessment of existing IT infrastructure at regional offices and LGUs; Identify gaps, risks, and constraints affecting the deployment and operation of PFM and other digital government systems;
10. Beneficiaries:	Department of Budget and Management (DBM)

Revised	0
7. Total Proposal Cost:	0

8. Description:	"The Managed Services for IT Skills and Competency Gap Assessment Across Local Government Units (LGUs) and Regions in Support of Public Financial Management (PFM) Systems will assess the current IT skills and competencies of personnel across LGUs and regional offices to determine their readiness to support digital PFM systems. The engagement will establish a standardized assessment methodology, conduct surveys and interviews, and analyze results to identify capacity gaps affecting the implementation and operation of digital systems. The project will define the required competencies and training needs, design a capacity building program, and estimate the resources required for training implementation. It will also prepare procurement documents for training providers and establish mechanisms to monitor training delivery. Pilot training sessions will be conducted in selected LGUs, followed by a broader rollout at the regional level. The engagement will also provide technical support during training activities and conduct post training evaluations to assess effectiveness and improve future capacity building programs. The project supports the Public Financial Management (PFM) Reforms Roadmap 2024–2028, particularly Strategic Focus Area 5: PFM Capacity Development and Strategic Focus Area 10: PFM for Local Government Units, by strengthening the institutional capabilities required to support digital PFM systems. It also aligns with the PFM Digital Transformation Roadmap 2024–2028, which emphasizes the development of digital skills and competencies necessary to sustain modern government systems. "□

8. Description:	□□□□□□□				
9. Purpose:	The project aims to strengthen IT competencies to ensure effective implementation, management, and sustainability of Digital PFM systems at the LGU and regional levels. It seeks to establish a standardized and sustainable capacity-building framework aligned with national digital PFM priorities. Ultimately, the project supports improved system resilience, reduced technology risks, and long-term institutional readiness.□□□□□□□
